

Tarun Kurapaty
Energy Science and Engineering
Indian Institute of Technology Bombay

22B1537
B.Tech.
Gender: Male

Examination	University	Institute	Year	CPI / % Credits
Graduation	IIT Bombay	IIT Bombay	2026	

Chartered Financial Analyst (CFA) Level 1 Candidate (February 2026) by the CFA Institute, USA

SCHOLASTIC ACHIEVEMENTS

Achieved AA in 11 and AB in 17 courses	Secured 99.7 percentile among 1.7 Lakh+ candidates in Telangana state EAMCET ('22)

PROFESSIONAL EXPERIENCE

Larsen & Toubro Investment Analyst Intern (Jul'25-Sept'25)	<i>Involved with Innovation Fund – The corporate venture capital arm of Larsen & Toubro focused on deep-tech</i> - Assigned to map deep-tech investment opportunities synergizing with L&T's existing business verticals - Tasked to scout 50+ growth stage startups across 10+ electric vehicle segments spanning full value chain - Benchmarked Electric Vehicle motor technologies across 5 key parameters, identified 10+ industry players	
Wood Mackenzie Summer Research Analyst Intern (May'25-Jul'25)	<i>Part of the Power & Renewables Team – 1/5 interns selected across India, supporting APAC power modelling</i>	
	Open Access	- Assessed Open Access charges across 10+ states using tariff orders and regulatory reports - Evaluated state-wise market attractiveness using DISCOM data and energy policy insights
	Levelized Cost of Electricity	- Extracted land lease data for 30+ countries, enhancing accuracy of global LCOE database - Curated a capital cost index utilizing CEA & RBI data for 50+ conventional power plants - Benchmarked index against Wholesale Price Index to find inflation related correlations
Asha Ventures Analyst Intern (Jun'24-Sept'24)	<i>Sustainability & Inclusion focused fund investing in early to growth stage companies with a corpus of \$100 Mn</i> - Performed competitive landscaping of BESS sector by analyzing technology differentiation of 15+ players - Mapped 45+ Indian EV component players detailing their revenue, funding, and product differentiation - Identified 5+ challenges in reusable packaging, mapped early-stage to mature players across the sector	

RESEARCH PROJECT

Modelling of Battery Energy Storage System (Dec'24-Jan'25)	<i>Research Project Guide: Prof. D. Venkatramanan, Department of Energy Science and Engineering, IIT Bombay</i>	
	- Reviewed literature on demand modelling of a battery swapping station utilizing nested Markov chains - Simulated \$10k annual revenue for 10 MWh battery system using Q-learning-based electricity arbitrage - Utilised MATLAB Simulink to implement model predictive control for converters tied to grid via LC filters - Found 50% reduction in voltage error for 5-level grid-tied inverter compared to 3-level grid-tied inverter	

POSITIONS OF RESPONSIBILITY

Expertise Network Head ShARE IITB (Aug'24-Present)	<i>Global leadership program is catered to over 2300+ students from 50+ top universities across 20+ countries</i> - Guiding a group of 6 students on startup project, structured problem solving and strategic presentations - Delivered a strategic presentation outlining key global policies & initiatives for climate change mitigation - Consulted Kidiaree (after-school activity startup) on competitive analysis and loyalty program strategies	
ASMP Coordinator Student Alumni Relations Cell (Jun'23-Apr'24)	<i>ASMP (Alumni Student Mentorship Program) fosters mentorship initiatives linking IITB students and alumni</i> - Executed the yearlong mentorship program catering to 700+ students & 400+ alumni across 10+ sectors - Orchestrated mock interviews taken up by 100+ alumni to help 400+ third-year students prep effectively - Organized logistics for Shadow Program - enabling office visits to firms like L&T, CDSL & NSE for students	

KEY PROJECTS

Role of ESG metrics in Investments (Jun'24-Aug'24)	<i>Collaborated in a team of 4 to study role of ESG in finance as part of FinSearch by Finance Club, IIT Bombay</i> - Performed data analysis on S&P 500, analysing dependence of risk-reward trade-offs on ESG risk scores - Implemented ESG constraints in Markowitz portfolio optimization & analyzed efficient frontier variation	
Switch Energy Case Energy Transition plan for Guatemala (Sep'24-Oct'24)	<i>Curated \$4.8 Bn energy mitigation plan for Guatemala after comparing 6 energy poverty factors to Ecuador</i> - Devised national ethanol plan covering cookstove distribution, refinery setup, and E10 blend integration - Proposed PAYG solar with storage & small hydro to boost grid resiliency and rural electrification by 28% - Assessed impact of our plan on 6+ SDGs, estimating 30k+ new jobs & 80%+ cut in hazardous gas emissions	

EXTRA-CURRICULARS

Pan-IIT	- Secured 2nd position in Bizzaro (pan-IIT bizarre object pitching competition) among 20+ competing teams - Among top performers (14/80) in pan-IIT/IIM Inter-Chapter Group Discussion organized by ShARE IIT BHU	
Entrepreneurship	- Ideated a review data analytics startup for IDEAS Level 1, qualified for ₹ 0.25 Mn grant & Level 2 selection - Hosted Start It Up by onboarding entrepreneur alums as speakers, addressing audience pool of over 50	
Events	- Catered to FnB & operational demands of 10k+ people during E-Summit - Asia's largest business conclave - Coordinated corporate relations for Energy Day – industry/research event of Energy Science Department	
Teaching	Taught science to 7th grade LCCWA students and 11th grade OAV students under National Service Scheme
